Claim 38 is allowed because the prior art of record when considered as a whole, alone or in combination, neither anticipates nor renders obvious a refrigeration compressor control method comprising the compressor is run at a high frequency immediately after starting, each high frequency period is immediately followed by a low frequency period, each low frequency period, except for a last low frequency period, is immediately followed by a high frequency period, the compressor is run at the normal operating frequency immediately after the last low frequency period.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
